

# You're Invited!

*What:* Stakeholder meetings on rightsizing pilot project candidate corridors

*When:* Thursday, June 11 3:30 p.m. **OR** Thursday, June 11 5:30 p.m.

*Where:* 2108 55th Street  
Flatirons Property Management

## Questions?

Please direct questions to the co-project managers:

**Marni Ratzel,**  
senior transportation planner:  
[ratzelm@bouldercolorado.gov](mailto:ratzelm@bouldercolorado.gov)  
or 303-441-4138

**Dave (DK) Kemp,**  
senior transportation planner:  
[kempd@bouldercolorado.gov](mailto:kempd@bouldercolorado.gov)  
or 303-441-1955

The city of Boulder is considering pilot projects along four candidate corridors to enhance multimodal access and safety. The project team will offer two stakeholder meetings on June 11 at 3:30 and 5:30 p.m. Each meeting will begin with a brief presentation on the living lab program and rightsizing design options for public feedback. A question and answer session will follow. Please join us to share your input.

## What is the Living Lab?

The City of Boulder's Living Laboratory Program tests new transportation designs with the intent to help people of all ages and abilities feel more comfortable traveling when bicycling, walking, and riding the bus. Each facility treatment is installed as a pilot project for 12 to 18 months allowing for experimentation and evaluation. The Phase II Living Lab program is underway. The City is considering pilot projects to repurpose travel lanes along certain multiuse arterial roadways to enhance access and safety for all modes of travel. Candidate "Complete Street" corridors include portions of Iris Avenue, Folsom Street, 55th Street, and 63rd Street.
